**Ex. 6 - Personal Privacy**

Mike,

It means that the previous final risk assessments included only a subset of the conditions of use for those chemicals, so within three years we will complete risk evaluations for known/reasonably foreseen conditions of use. Per section 26(l)(4), we intend to move forward with the proposed rules.

All the best,

Jeff

Jeff, a quick question. Does the listing of TCE, NMP and methylene chloride mean that the risk evaluations will be reopened and expanded, and that the current proposed rules will be put on hold?
